

Weather

Concept: scientists can predict what the weather will be like by looking at clouds.

What You Need –

- a container with a metal lid
- some ice cubes
- some very warm water

What You Do –

- Quarter fill the container with warm water.
- Place the lid upside down on the container.
- Put the ice cubes on top of the lid.

What You Should Notice –
A cloud forms in the container.

Explanation –

Write your explanation here.
